## PERFORMANCE FEATURES:

### All-Around Design

Based on exhaustive testing and tour validation, this 460cc titanium head offers the greatest combination of distance, forgiveness and accuracy in any driver we've ever made. It's ready for whenever you want to launch it, control it, or work it.

### Precision Adjustability

An adjustable hosel offers 12 different settings to precisely tune loft, lie and face angle – loft and lie have a total range of 3°, while face angle has a total range of 4.5°. The back of the sole has an adjustable weight screw to optimize swingweight.

### Optimal Center Of Gravity

Advanced wall construction allows more weight to be positioned lower in the club head for a high, penetrating flight.

### Largest Sweet Spot

Our latest enhanced variable face thickness technology creates the hottest flight on center strikes and even faster ball speed on off-center hits for maximum forgiveness.

### Premium Matrix OZIK 6Q3 Shaft

Co-engineered by Cleveland Golf and Matrix, one of the fastest growing shaft brands on tour. This mid-launch shaft provides an all-around combination of speed and stability with solid feel at impact.

## SPECS:

LOFT	HEAD SIZE	LENGTH	SW	FACE ANGLE	TOTAL WEIGHT
9°	460cc	45.5"	D5	Adjustable	305g
10.5°	460cc	45.5"	D5	Adjustable	305g
